

DENTO-PREP™ DUST-CABINET 12V

INSTRUCTIONS FOR USE

REF 1905 | en

Intended use:

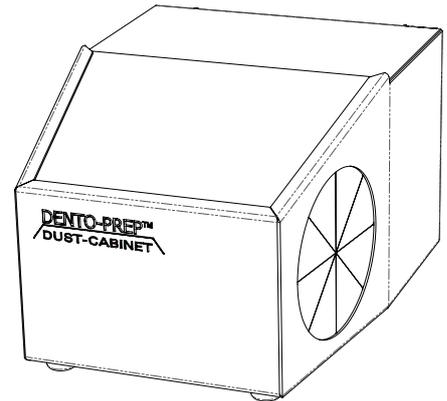

DUST-CABINET is intended for powder blasting procedures with DENTO-PREP™.

Preparation:

Attach the power supply cable and your DUST-CABINET is ready for use. The window in the DUST-CABINET can be removed by pushing/sliding it upwards.

Safety precautions:

-  Use only the power supply delivered with the device.
-  Disconnect the power supply from DUST-CABINET during cleaning and filter change.
-  Gloves should be worn whenever using DUST-CABINET.

Maintenance:

Regular cleaning of the DUST-CABINET is recommended: Remove the window and vacuum the used powder.

Filter change:

The DUST-CABINET is equipped with a dust filter which protects the built-in electronic suction system against the powder. Inspect the filter regularly. If the filter is damaged or worn replace the filter by following step 1-4.
