

**GENERAL INFORMATION**  
TheraCem Ca is a self-curing, self-adhesive, dual-cure resin luting cement that is used to cement crowns, bridges, inlays, onlays, ortho and post fabricated metal and non-metallic parts, as well as resin castings. TheraCem Ca is a hybrid resin composite with a silica filled filler requiring no etching or bonding of the prepared surfaces. It is easy to use and provides excellent adhesion to all surfaces. It can be used in restorations according to your identification of ISO 4049.

**Indications for use:**  
• Crowns, bridges, inlays, onlays (including post-to-post-to-dee-tail and end onlays) and ortho.  
• Full crown, Cement inlays, Ortho and onlays (including alumina and zirconia).  
• Resin castings, bridges, inlays, onlays (post-bond composite/composite-cement).  
• Cement (including cast and non-cast) for Endodontic posts.  
• Implant attachment to dental abutment.  
• Full crown cement, Cement inlays, Ortho and onlays (including alumina and zirconia).  
• Resin castings, bridges, inlays, onlays (post-bond composite/composite-cement).  
• Cement (including cast and non-cast) for Endodontic posts.  
• Implant attachment to dental abutment.

**Contraindications:**  
TheraCem Ca is not recommended for veneer cementation.  
NOTE: It is recommended to use TheraCem® Ca in the following situations:  
• **Anterior contact:** with the choice of unspecified/veneering resin may make sense in situations in susceptible pieces. In case of contact with metal, TheraCem Ca is not recommended.  
• **Saliva and oral contact:** may occur during placement of the cement. TheraCem Ca is not recommended for these situations.

**Contra-indications:**  
• Product may contain fillers that are degraded by the use of bleaching agents.  
• Product is not recommended for use on metal surfaces.  
• Use of commonly available hygiene protective covering to avoid any contact with your skin. Do not eat, drink or smoke.  
• Use of commonly available hygiene protective covering to avoid any contact with your skin. Do not eat, drink or smoke.

**Precautions:**  
• TheraCem Ca is not recommended for use on metal surfaces.  
• TheraCem Ca should be used in accordance with the warm retreat instructions.

**ALLGEMEINE INFORMATIONEN**  
TheraCem Ca ist ein selbsthärtendes, selbstklebendes, dual-cure Resin-Klebermittel, das verwendet wird, um Kronen, Brücken, Inlays, Onlays und ortho- und post-fertiggestellte Metall- und Nichtmetallteile sowie Harzschmelzungen zu verkleben. TheraCem Ca ist ein Hybrid-Resin-Composit mit einem Silica-füllstoff, das keine Ätzen- oder Bindungsanforderungen an die vorbereitete Oberfläche erfordert. Es ist leicht zu verwenden und bietet hervorragende Adhäsion für alle Oberflächen. Es kann gemäß Ihrer Identifizierung nach ISO 4049 verwendet werden.

**Anzeigungen für den Einsatz:**  
• Kronen, Brücken, Inlays, Onlays (inklusive Post-zu-Post-zu-Dee-Tail und Endonlays) und ortho.  
• Vollkronen, Klebefüllungen, Ortho- und Onlays (inklusive Alumina und Zirkon).  
• Harzschmelzungen, Brücken, Inlays, Onlays (Post-Bond-Composite/Composit-Zement).  
• Zement (einschließlich gegossene und nicht gegossene) für Endodontische Posten.  
• Implantat-Anschluss an Zahnavsatze.  
• Vollkronen, Klebefüllungen, Ortho- und Onlays (inklusive Alumina und Zirkon).  
• Harzschmelzungen, Brücken, Inlays, Onlays (Post-Bond-Composite/Composit-Zement).  
• Zement (einschließlich gegossene und nicht gegossene) für Endodontische Posten.  
• Implantat-Anschluss an Zahnavsatze.

**Gegenanzeigen:**  
TheraCem Ca ist nicht für die Verklebung von Veneers geeignet.  
**NOTIZ:** Es wird empfohlen, TheraCem® Ca in den folgenden Situationen zu verwenden:  
• **Anteriorer Kontakt:** mit der Wahl von ungefüllten/verleibenden Harz kann in Situationen mit empfindlichen Teilen Sinn machen. In Fällen des Kontakts mit Metall ist TheraCem Ca nicht zu empfehlen.  
• **Speichel- und Mundkontakt:** kann während der Anwendung auftreten. TheraCem Ca ist nicht für diese Situationen zu empfehlen.

**Gegenanzeigen:**  
• Das Produkt kann Füllstoffe enthalten, die durch Bleichmittel abgebaut werden können.  
• Das Produkt ist nicht für den Einsatz auf Metall empfohlen.  
• Die Verwendung von üblicherweise verfügbaren Hygiene-Schutzmaßnahmen, um jeglichen Kontakt mit Ihrer Haut zu vermeiden, wird empfohlen.  
• Die Verwendung von üblicherweise verfügbaren Hygiene-Schutzmaßnahmen, um jeglichen Kontakt mit Ihrer Haut zu vermeiden, wird empfohlen.

**Verwendung:**  
• TheraCem Ca sollte in Übereinstimmung mit den warmen Rückzugsanweisungen verwendet werden.  
**Warnhinweise:**  
• Das Produkt enthält Füllstoffe, die durch Bleichmittel abgebaut werden können.  
• Das Produkt ist nicht für den Einsatz auf Metall empfohlen.  
• Die Verwendung von üblicherweise verfügbaren Hygiene-Schutzmaßnahmen, um jeglichen Kontakt mit Ihrer Haut zu vermeiden, wird empfohlen.  
• Die Verwendung von üblicherweise verfügbaren Hygiene-Schutzmaßnahmen, um jeglichen Kontakt mit Ihrer Haut zu vermeiden, wird empfohlen.

**Contraindications:**  
TheraCem Ca is not recommended for veneer cementation.  
NOTE: It is recommended to use TheraCem® Ca in the following situations:  
• **Anterior contact:** with the choice of unspecified/veneering resin may make sense in situations in susceptible pieces. In case of contact with metal, TheraCem Ca is not recommended.  
• **Saliva and oral contact:** may occur during placement of the cement. TheraCem Ca is not recommended for these situations.

**INFORMACIONES GENERALES**  
TheraCem Ca es un cemento resina autoadhesivo, dual-cure (resina de curado por radiación y autoadhesivo) que se utiliza para cementar coronas, puentes, inlays, onlays y ortodontias. También se utiliza para cementar piezas fabricadas en metal y no metálicas, así como resinas de construcción. TheraCem Ca es un resina compuesta híbrida con un relleno de sílice que no requiere preparación ni grabado de la superficie de la pieza a cementar. Es fácil de utilizar y proporciona una excelente adhesión a todas las superficies. Puede utilizarse de acuerdo a su identificación de ISO 4049.

**Indicaciones para el uso:**  
• Coronas, puentes, inlays, onlays (incluyendo post-a-post-a-dee-tail y onlays finales) y ortodontias.  
• Coronas completas, inlays, onlays, ortho (incluyendo aluminio y zirconio).  
• Resinas de construcción, puentes, inlays, onlays (post-bond composite/composite-cement).  
• Cemento (incluyendo resina vertida y no vertida) para postes endodónticos.  
• Conexión de implantes a abutamiento dentario.  
• Coronas completas, inlays, onlays, ortho (incluyendo aluminio y zirconio).  
• Resinas de construcción, puentes, inlays, onlays (post-bond composite/composite-cement).  
• Cemento (incluyendo resina vertida y no vertida) para postes endodónticos.  
• Conexión de implantes a abutamiento dentario.

**Contraindicaciones:**  
TheraCem Ca no es recomendado para la cementación de carillas.  
**NOTA:** Se recomienda utilizar TheraCem® Ca en las siguientes situaciones:  
• **Contacto anterior:** con la elección de resina no rellena/verleibable puede tener sentido en situaciones susceptibles. En caso de contacto con metal, TheraCem Ca no se recomienda.  
• **Saliva y contacto bucal:** puede ocurrir durante la colocación del cemento. TheraCem Ca no se recomienda para estas situaciones.

**Contraindicaciones:**  
• Este producto puede contener elementos que se puedan decolorar con el uso de blanqueadores dentales.  
• Este producto no está diseñado para el uso en metales.  
• El uso de cubrenormalmente disponibles cubrenormalmente disponibles para evitar cualquier contacto con la piel. No coma, beba o fume durante el uso.

**INFORMAZIONE GENERALE**  
TheraCem Ca è un cemento resina autoadesivo, dual-cure (resina a indurimento per radiazioni e autoadesivo) che si utilizza per cementare corone, ponti, inlay, onlay e ortodontie. Viene anche utilizzato per cementare parti in metallo e non metalliche, nonché resine di costruzione. TheraCem Ca è un resina composita ibrida con un riempimento in silice che non richiede preparazione né lucatura della superficie. È facile da utilizzare e fornisce un'eccellente adesione a tutte le superfici. Può essere utilizzato secondo la sua identificazione ISO 4049.

**Indicazioni per l'uso:**  
• Corone, ponti, inlay, onlay (inclusi post-a-post-a-dee-tail e onlay finali) e ortodontie.  
• Corone complete, ponti, inlay, onlay (inclusi alluminio e zirconio).  
• Resine di costruzione, ponti, inlay, onlay (post-bond composite/composite-cement).  
• Cemento (incluso getto e non getto) per viti endodontiche.  
• Connessioni per innesti a abutmenti dentali.  
• Corone complete, ponti, inlay, onlay (inclusi alluminio e zirconio).  
• Resine di costruzione, ponti, inlay, onlay (post-bond composite/composite-cement).  
• Cemento (incluso getto e non getto) per viti endodontiche.  
• Connessioni per innesti a abutmenti dentali.

**Controindicazioni:**  
TheraCem Ca non è consigliato per la cementazione di cariche.  
**NOTA:** Si consiglia di utilizzare TheraCem® Ca in le seguenti situazioni:  
• **Contatto anteriore:** con la scelta di resina non riempita/verleibabile può avere senso in situazioni suscettibili. In caso di contatto con metallo, TheraCem Ca non è raccomandato.  
• **Saliva e contatto orale:** possono verificarsi durante la collocazione del cemento. TheraCem Ca non è raccomandato per queste situazioni.

**Contraindicazioni:**  
• Questo prodotto può contenere elementi che possono essere sbiancati con l'uso di sbiancanti dentali.  
• Questo prodotto non è progettato per l'uso su metalli.  
• È consigliato utilizzare le normali precauzioni per evitare qualsiasi contatto con la pelle. Non mangiare, bere o fumare durante l'uso.

**INFORMATION GENERAL**  
TheraCem Ca is a self-curing, self-adhesive, dual-cure resin luting cement that is used to cement crowns, bridges, inlays, onlays, ortho and post fabricated metal and non-metallic parts, as well as resin castings. **Contraindications:**  
TheraCem Ca is not recommended for veneer cementation.  
NOTE: It is recommended to use TheraCem® Ca in the following situations:  
• **Anterior contact:** with the choice of unspecified/veneering resin may make sense in situations in susceptible pieces. In case of contact with metal, TheraCem Ca is not recommended.  
• **Saliva and oral contact:** may occur during placement of the cement. TheraCem Ca is not recommended for these situations.

**Contra-indications:**  
• Product may contain fillers that are degraded by the use of bleaching agents.  
• Product is not recommended for use on metal surfaces.  
• Use of commonly available hygiene protective covering to avoid any contact with your skin. Do not eat, drink or smoke.  
• Use of commonly available hygiene protective covering to avoid any contact with your skin. Do not eat, drink or smoke.

**ALLMÄN INFORMATION**  
TheraCem Ca är ett självhärtnande, självklebände, dual-cure resinlutarande cement som används för att cementera kronor, broar, inlägg, onlays, ortodontier och ortodontiska apparater. TheraCem Ca är ett hybridresincomposit med ett siliciefyllande fyllmedel som inte kräver någon etsning eller förberedning av den beredda ytan. Det är lätt att använda och ger utmärkt adhäsi till alla ytor. Det kan användas enligt din ISO 4049-identifikation.

**Användningsområden:**  
• Kronor, broar, inlägg, onlays (inkluderande post-til-post-til-dee-tail och slutliga onlays) och ortodontier.  
• Fullständiga kronor, broar, inlägg, onlays (inkluderande alumina och zirkon).  
• Resinutrustningar, broar, inlägg, onlays (postbindkomposit/compositcement).  
• Cement (inkluderande gjutet och icke-gjutt) för endodontiska postar.  
• Implantatanslutning till tandabutment.  
• Fullständiga kronor, broar, inlägg, onlays (inkluderande alumina och zirkon).  
• Resinutrustningar, broar, inlägg, onlays (postbindkomposit/compositcement).  
• Cement (inkluderande gjutet och icke-gjutt) för endodontiska postar.  
• Implantatanslutning till tandabutment.

**Överensstämmelse:**  
TheraCem Ca är inte rekommenderat för cementering av fyllning.  
**NOTIS:** Det rekommenderas att använda TheraCem® Ca i följande situationer:  
• **Anterior kontakt:** med valet av ofyllt/verleibbart resin kan ha mening i sårbara situationer. I fall av kontakt med metall är TheraCem Ca inte rekommenderat.  
• **Saliva och munnkontakt:** kan förekomma under appliceringen av cementet. TheraCem Ca är inte rekommenderat för dessa situationer.

**Överensstämmelse:**  
• Produktet kan innehålla fyllmedel som kan degraderas av blekmedel.  
• Produkten är inte avsedd för användning på metaller.  
• Användning av vanligt tillgängliga hygieniska skyddsföråtgärder för att undvika hudkontakt rekommenderas för att undvika kontakt med huden.  
• Användning av vanligt tillgängliga hygieniska skyddsföråtgärder för att undvika kontakt med huden rekommenderas för att undvika kontakt med huden.
