| <p><b>Product description/Intended use:</b></p> <p>Trolytix Kimera is intended to accurately hold dental x-ray sensors, image plates and films during a x-ray of teeth.</p> <p>Red for Anterior PA's and Vertical Blewing.</p> <p>Yellow for Posterior PA's and Horizontal Blewing.</p> <p>Red for Horizontal PA's and Vertical Blewing.</p> <p><b>Precaution/Warning</b> ⚠</p> <p>Inspect product for proper function before use.</p> <p>Product should be processed according to processing instructions in between uses to prohibit crosscontamination.</p> <p>Always use a barrier device to protect the sensor during imaging.</p> <p><b>How to use:</b></p> <p>1. Trolytix Kimera Blue for Anterior PA's and Vertical Blewing. 2. Trolytix Kimera Yellow for Posterior PA's and Horizontal Blewing. 3. Trolytix Kimera Red for Horizontal Blewing. 4. The holder's level pin indicates the sensor's vertical and horizontal position. 5. Side black for apical frontal films. The blue block indicates an extension of the holder's front plate. This makes it possible to place the sensor further back and/or to the side. 6. The joining ring is color-coded to match both the holder and the image type. 7. The clip should be bent to the desired pressure at the sensor prior to use.</p> | <p><b>Описание на продукта/предназначение:</b></p> <p>Trolytix Kimera е предвиден за точно задържане на зъбни рентгенови сензори, пластични и филми за рентгенография по време на рентгеново сканиране.</p> <p>Зелен цвят за предни фронтални и вертикални рентгенови снимки за сканиране на сензори.</p> <p>Жълт цвят за задни фронтални и хоризонтални рентгенови снимки за сканиране на сензори.</p> <p>Червен цвят за задни фронтални и хоризонтални рентгенови снимки за сканиране на сензори.</p> <p>8-милитрови цвят за хоризонтални рентгенови снимки за сканиране на сензори.</p> <p><b>Предпазни мерки/предупреждения:</b></p> <p>Проверете продукта за правилна функция преди употреба.</p> <p>Продуктът трябва да се обработва съгласно инструкциите за употреба, за да се избегне кръстосано замърсяване.</p> <p>Винаги използвайте бариерно устройство, за да предпазите сензора по време на рентгенография.</p> <p><b>Как да се използва:</b></p> <p>1. Trolytix Kimera в син цвят – за предни фронтални и вертикални рентгенови снимки за сканиране на сензори.</p> <p>2. Trolytix Kimera в жълт цвят – за задни фронтални и хоризонтални рентгенови снимки за сканиране на сензори.</p> <p>3. Trolytix Kimera в червен цвят – за хоризонтални рентгенови снимки за сканиране на сензори.</p> <p>4. Нивото на дъното на държателя показва вертикалната и хоризонталната позиция на сензора. 5. Черният блок показва продължение на предната плоча на държателя. Това прави възможно поставянето на сензора малко по-назад и/или по-странично. 6. Присъединителният пръстен е боядисан съгласно цвета на държателя и на снимката. 7. Присъединителният пръстен трябва да бъде огънат до постигане на желаната сила на натиск преди употреба.</p> | <p><b>Produktbeskrivelse/Intent:</b></p> <p>Trolytix Kimera er beregnet til præcist at holde sensorer, billedplader og film, når der tages røntgenbilleder af tænder.</p> <p>Blå for anterior PA og vertikal skulder.</p> <p>Gul for posterior PA og horisontal blødd.</p> <p>Rød for posterior PA og vertikal skulder.</p> <p><b>Foelholdelses/adværslinger:</b></p> <p>Prøve produktet for korrekt funktion inden brug.</p> <p>Produktet skal behandles henholdsvis til behandlingsanvisningerne mellem anvendelser for at undgå krydsforurening.</p> <p>Brug altid en barriere til at beskytte sensoren under billedtagningen.</p> <p><b>Anvendelse:</b></p> <p>1. Trolytix Kimera – Blå til anterior PA og tand skulder skulder. 2. Trolytix Kimera – Gul til posterior PA og vertikal skulder. 3. Trolytix Kimera – Rød til vertikal skulder. 4. Holderens niveauafviser angiver sensorens lodrette og vandrette position. 5. Blåblok til apikale frontale film. Blåblokken fungerer som en forlængelse af holderens blåplade. Dette gør det muligt at placere sensoren længere tilbage i holderens plade. 6. Samlingen er farvekodet, så den passer til både holdere og billedtypen. 7. Kløsen skal bøjes til det ønskede tryk mod sensoren inden brug.</p> | <p><b>Produktdescription/vorgesehene Verwendung:</b></p> <p>Trolytix Kimera handelt es sich um einen Halter für präzise Positionierung dentaler Röntgenaufnahmen. Bildrahmen und Röntgenfilme während Röntgenaufnahmen der Zähne.</p> <p>Blau für anterior PA und vertikale Bisultraufnahmen. 3. Trolytix Kimera Gelb für horizontale Bisultraufnahmen. 4. Der Niveaumarkierer des Halters gibt die vertikale und horizontale Position des Halters an. 5. Aufbaublock für apikale Frontalfilme. Der Aufbaublock wirkt als Erweiterung des Aufbaubereichs des Halters. Dadurch kann der Sensor weiter hinten im Halter platziert werden. 6. Die Samlung ist ebenfalls farbcodiert, so dass sie zu den jeweiligen Bildformaten passt. 7. Die Klammer sollte vor Verwendung entriegelt und der Sensor auf den gewünschten Druck eingeregelt werden.</p> <p><b>Vorsichtswarnung:</b></p> <p>Überprüfen Sie sich vor der Verwendung des Produkts von dessen ordnungsgemäßer Funktion.</p> <p>Das Produkt ist zwischen Anwendungen gemäß der Anweisungen zur Handhabung zu behandeln, um eine Kreuzkontamination zu vermeiden.</p> <p>Verwenden Sie stets eine Schutzschicht, um den Sensor während des bildgebenden Verfahrens zu schützen.</p> <p><b>Anwendung:</b></p> <p>Trolytix Kimera Blau für anterior PA und vertikale Bisultraufnahmen. 2. #### Processing instructions

| Product                     | Trolytix Kimera is an aiming and positioning device for intrarad digital x-ray intended for use as an aid in dental imaging.                                                                                                                                                       |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Warnings                    | Place in the middle of the ardent, not against the autoadv's wall or behind support. <p>If the holder is exposed to pressure or weight exerted by other objects during autocleaning, it may deform. After autocleaning can easily be changed by gently by changing the holder.</p> |
| Limitations on reprocessing | The characteristics of the plastic are affected by autocleaning, resulting in limited product life.                                                                                                                                                                                |

| Preparation before cleaning | Instruction |                             | Wipe off the instrument after use to prevent soil and debris from drying on the instrument. Perform cleaning as soon as possible after use. Do not exceed 2 hours.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|                             | Soft bristle brushes of various sizes, Ultrasonic bath.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Detergent                   | Follow agent manufacturers recommendations for concentration and temperature. Manual: Enzymatic or low alkaline, suitable for dental cleaning. Automatic: Enzymatic or low alkaline, suitable for dental cleaning with minimal biofouling characteristics on remaining.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Water quality               | Drinking water quality for manual cleaning and distilled or de-mineralized water for ultrasonic bath and final rinse. Tap water is not recommended.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Instruction                 | 1. Immerse in freshly prepared cleaning solution as per manufacturer's instructions at maximum temperature 40°C. Clean mechanically with a brush, working beneath the liquid level, until shiny class. <p>2. Rinse thoroughly. <p>3. Clean in ultrasonic bath for a minimum of 5 minutes, using a frequency of 35-45 KHz and power min. 150 W. Make sure the SS-45 KHz is in power min. 150 W. <p>4. Rinse thoroughly for min 30 seconds. <p>5. Clean in distilled or de-mineralized water for min 30 seconds. <p>6. Clean in distilled or de-mineralized water for min 30 seconds. <p>7. Rinse thoroughly for min 30 seconds. <p>8. Clean in distilled or de-mineralized water for min 30 seconds. <p>9. Clean in distilled or de-mineralized water for min 30 seconds. <p>10. Clean in distilled or de-mineralized water for min 30 seconds. <p>11. Clean in distilled or de-mineralized water for min 30 seconds. <p>12. Clean in distilled or de-mineralized water for min 30 seconds. <p>13. Clean in distilled or de-mineralized water for min 30 seconds. <p>14. Clean in distilled or de-mineralized water for min 30 seconds. <p>15. Clean in distilled or de-mineralized water for min 30 seconds. <p>16. Clean in distilled or de-mineralized water for min 30 seconds. <p>17. Clean in distilled or de-mineralized water for min 30 seconds. <p>18. Clean in distilled or de-mineralized water for min 30 seconds. <p>19. Clean in distilled or de-mineralized water for min 30 seconds. <p>20. Clean in distilled or de-mineralized water for min 30 seconds. <p>21. Clean in distilled or de-mineralized water for min 30 seconds. <p>22. Clean in distilled or de-mineralized water for min 30 seconds. <p>23. Clean in distilled or de-mineralized water for min 30 seconds. <p>24. Clean in distilled or de-mineralized water for min 30 seconds. <p>25. Clean in distilled or de-mineralized water for min 30 seconds. <p>26. Clean in distilled or de-mineralized water for min 30 seconds. <p>27. Clean in distilled or de-mineralized water for min 30 seconds. <p>28. Clean in distilled or de-mineralized water for min 30 seconds. <p>29. Clean in distilled or de-mineralized water for min 30 seconds. <p>30. Clean in distilled or de-mineralized water for min 30 seconds. <p>31. Clean in distilled or de-mineralized water for min 30 seconds. <p>32. Clean in distilled or de-mineralized water for min 30 seconds. <p>33. Clean in distilled or de-mineralized water for min 30 seconds. <p>34. Clean in distilled or de-mineralized water for min 30 seconds. <p>35. Clean in distilled or de-mineralized water for min 30 seconds. <p>36. Clean in distilled or de-mineralized water for min 30 seconds. <p>37. Clean in distilled or de-mineralized water for min 30 seconds. <p>38. Clean in distilled or de-mineralized water for min 30 seconds. <p>39. Clean in distilled or de-mineralized water for min 30 seconds. <p>40. Clean in distilled or de-mineralized water for min 30 seconds. <p>41. Clean in distilled or de-mineralized water for min 30 seconds. <p>42. Clean in distilled or de-mineralized water for min 30 seconds. <p>43. Clean in distilled or de-mineralized water for min 30 seconds. <p>44. Clean in distilled or de-mineralized water for min 30 seconds. <p>45. Clean in distilled or de-mineralized water for min 30 seconds. <p>46. Clean in distilled or de-mineralized water for min 30 seconds. <p>47. Clean in distilled or de-mineralized water for min 30 seconds. <p>48. Clean in distilled or de-mineralized water for min 30 seconds. <p>49. Clean in distilled or de-mineralized water for min 30 seconds. <p>50. Clean in distilled or de-mineralized water for min 30 seconds. <p>51. Clean in distilled or de-mineralized water for min 30 seconds. <p>52. Clean in distilled or de-mineralized water for min 30 seconds. <p>53. Clean in distilled or de-mineralized water for min 30 seconds. <p>54. Clean in distilled or de-mineralized water for min 30 seconds. <p>55. Clean in distilled or de-mineralized water for min 30 seconds. <p>56. Clean in distilled or de-mineralized water for min 30 seconds. <p>57. Clean in distilled or de-mineralized water for min 30 seconds. <p>58. Clean in distilled or de-mineralized water for min 30 seconds. <p>59. Clean in distilled or de-mineralized water for min 30 seconds. <p>60. Clean in distilled or de-mineralized water for min 30 seconds. <p>61. Clean in distilled or de-mineralized water for min 30 seconds. <p>62. Clean in distilled or de-mineralized water for min 30 seconds. <p>63. Clean in distilled or de-mineralized water for min 30 seconds. <p>64. Clean in distilled or de-mineralized water for min 30 seconds. <p>65. Clean in distilled or de-mineralized water for min 30 seconds. <p>66. Clean in distilled or de-mineralized water for min 30 seconds. <p>67. Clean in distilled or de-mineralized water for min 30 seconds. <p>68. Clean in distilled or de-mineralized water for min 30 seconds. <p>69. Clean in distilled or de-mineralized water for min 30 seconds. <p>70. Clean in distilled or de-mineralized water for min 30 seconds. <p>71. Clean in distilled or de-mineralized water for min 30 seconds. <p>72. Clean in distilled or de-mineralized water for min 30 seconds. <p>73. Clean in distilled or de-mineralized water for min 30 seconds. <p>74. Clean in distilled or de-mineralized water for min 30 seconds. <p>75. Clean in distilled or de-mineralized water for min 30 seconds. <p>76. Clean in distilled or de-mineralized water for min 30 seconds. <p>77. Clean in distilled or de-mineralized water for min 30 seconds. <p>78. Clean in distilled or de-mineralized water for min 30 seconds. <p>79. Clean in distilled or de-mineralized water for min 30 seconds. <p>80. Clean in distilled or de-mineralized water for min 30 seconds. <p>81. Clean in distilled or de-mineralized water for min 30 seconds. <p>82. Clean in distilled or de-mineralized water for min 30 seconds. <p>83. Clean in distilled or de-mineralized water for min 30 seconds. <p>84. Clean in distilled or de-mineralized water for min 30 seconds. <p>85. Clean in distilled or de-mineralized water for min 30 seconds. <p>86. Clean in distilled or de-mineralized water for min 30 seconds. <p>87. Clean in distilled or de-mineralized water for min 30 seconds. <p>88. Clean in distilled or de-mineralized water for min 30 seconds. <p>89. Clean in distilled or de-mineralized water for min 30 seconds. <p>90. Clean in distilled or de-mineralized water for min 30 seconds. <p>91. Clean in distilled or de-mineralized water for min 30 seconds. <p>92. Clean in distilled or de-mineralized water for min 30 seconds. <p>93. Clean in distilled or de-mineralized water for min 30 seconds. <p>94. Clean in distilled or de-mineralized water for min 30 seconds. <p>95. Clean in distilled or de-mineralized water for min 30 seconds. <p>96. Clean in distilled or de-mineralized water for min 30 seconds. <p>97. Clean in distilled or de-mineralized water for min 30 seconds. <p>98. Clean in distilled or de-mineralized water for min 30 seconds. <p>99. Clean in distilled or de-mineralized water for min 30 seconds. <p>100. Clean in distilled or de-mineralized water for min 30 seconds. <p>101. Clean in distilled or de-mineralized water for min 30 seconds. <p>102. Clean in distilled or de-mineralized water for min 30 seconds. <p>103. Clean in distilled or de-mineralized water for min 30 seconds. <p>104. Clean in distilled or de-mineralized water for min 30 seconds. <p>105. Clean in distilled or de-mineralized water for min 30 seconds. <p>106. Clean in distilled or de-mineralized water for min 30 seconds. <p>107. Clean in distilled or de-mineralized water for min 30 seconds. <p>108. Clean in distilled or de-mineralized water for min 30 seconds. <p>109. Clean in distilled or de-mineralized water for min 30 seconds. <p>110.
